MINISTRY OF MINES AND
MINING DEVELOPMENT

How To
GET A MINING CLAIM

As we move Towards the attainment of an
empowered upper middle class income
society by the year 2030

PROSPECTING

1. A prospecting licence is required at this stage and it is acquired at our Provincial Offices.
2. You need a national ID or company documents and pay a gazetted fee.
3. The prospecting licence is valid for two (2) years
4. As a holder of a Prospecting License you automatically acquire the rights of prospecting and pegging mining claims anywhere in that province.

5. When a Prospecting Licence holder has identified a mineral deposit that he/she is interested in, he/she appoints an agent or an Approved Prospector to peg on his/her behalf.

PEGGING

6. The agent is required to physically peg the area by marking the deposit with a Discovery Peg. He/She should also post Prospecting, Discovery and Registration Notices on the ground. The notices must be posted in a conspicuous manner to alert other prospectors.

7. An application for registration must be submitted to the Provincial Mining Director. The application must have copies of the following attachments:

- a. Prospecting licenses;
- b. Prospecting Notice;
- c. Discovery Notice (Base Minerals);
- d. Notification of intention to prospect to the landowner;
- e. A map in triplicate to the scale of 1:25000.

8. If the Provincial Mining Director is satisfied that all pegging procedures have been followed he shall issue a certificate of registration upon payment of the gazetted fee. This allows the holder to start mining operations subject to meeting other obligations like Environment Impact Assessment (EIA).

REGISTRATION
